GridVis® 7 System requirements

Supported operating systems:
- Microsoft Windows Server 2008
- Microsoft Windows Server 2012
- Microsoft Windows 7
- Microsoft Windows 8
- Microsoft Windows 10
- Linux distributions on request and only for large projects

Supported web browsers:
- Google Chrome (latest version) - recommended
- Microsoft Edge
- Microsoft IE (from 9)
- Firefox (latest version)
- Safari (only iOS/MAC)

PC system requirements:
- Latest processor architecture
  - Recommended: Intel Xeon (server compatible)
- RAM: 8 GB
  - Recommended: 16 GB
- Installation storage space: 1 GB
- Measured data storage space: Dependent on the volume of measured data, storage depth and archiving time frame
- Recommended and optimized screen resolution: 1280 x 960 Pixel

Databases:
- MSSQL - recommended
  - MSSQL 2014 is supported
  - Express versions are not supported!
- MySQL (from 5.6)
- JanDB (not network drive compatible/no multi-user support) - included in the scope of supply.

Virtual machines:
Limitations for virtual machines are unknown
- Citrix environments are not supported!

Note:
The licensing process encompasses system parameters such as CPU, PC-ID, MAC and DISK size.
Retain these values after licensing! Otherwise re-licensing will be necessary!

The system requirements are
- Dependent on the project size and the number of measurement points
- Recommendations and may be adjusted upwards for larger projects
